Thanks to Mobilitas project, some techniques, tools and services will be tested in order to create some sustainable mobility models for local people and tourists. In this issue some of the events are listed:

**TORRES VEDRAS, Portugal 26th September 2017**

The horizontal GO SUMP urban mobility project gathered in Torres Vedras, Portugal, the 26th of September, for the second community building event. In addition to MOBILITAS, another five modular projects of the Low Carbon Economy and Urban Transports community were presented, namely CAMPSUMP, LOCATIONS, MOTIVATE, REMEDIO and SUMPORT.

In this second meeting, participants were able to exchange their ideas and talk about foreseen activities divided into different thematic groups, sharing good practices and identifying ways to collaborate efficiently. The following days the CIVITAS Forum took place where the mobility projects were also submitted. The annual event of CIVITAS forum brought together European mobility experts, actors and stakeholders, all of whom are devoted to the development of sustainable urban mobility in their cities.

**MISANO ADRIATICO, Italy 6th October 2017**

On October, the actions and objectives of the MOBILITAS project on sustainable mobility where presented in the event “Cycling in Misano: for an even more welcoming city”, where there were also exposed the actions and the concrete project for Misano.Karl Reiter, researcher of the company FGM-AMOR of Graz, was the speaker and he gave some proposals for Misano Adriatico. As an international expert on issues of sustainable mobility and cybersecurity, he has collaborated in several European projects in the field of active mobility and the habitability of public space.
Bonn, Germany 9th November 2017
During the 23rd Conference of the Parties to the United Nations Framework Convention on Climate Change (COP23), ENERGIES 2050 organized an event dedicated to MOBILITAS as well as a full thematic day on Transition and sustainable Mobility in the Mediterranean.

The organizations who took part that day were United Cities and Local Governments of Africa, the EuroMediterranean Forum of Institute for Economic Sciences (FEMISE), the Institute of the Mediterranean, the Moroccan Alliance for Climate and Sustainable Development and the Renewable energy association of Turkey, and it was estimated that over 100 participants attended the whole set of events.

Rimini, Italy 24th-25th May
4th MOBILITAS transnational project meeting was held in Rimini, Italy. Beside the presentations that partners held to show the progress of the project, project partners got acquainted also with other activities in the fields of mobility and urban planning. In the afternoon session a study visit to the Municipality of Misano Adriatico was organized. The mayor and the representatives of the Municipality explained to the partners the process of SUMP preparation.

The next partners' meeting will be held in Limassol, Cyprus, 23rd-24th October 2018.
