TRUST EPC @ THE 5TH INTERNATIONAL CONFERENCE ON RENEWABLE ENERGY SOURCES & ENERGY EFFICIENCY

The 5th International Conference on Renewable Energy Sources & Energy Efficiency was held in Nicosia, on 5-6 May 2016 under the auspices of the Minister of Commerce, Industry and Tourism of Cyprus, bringing together policy makers, key stakeholders of the energy efficiency and the renewable energy fields.

EU SUSTAINABLE ENERGY WEEK 2016

The EU Sustainable Energy Week 2016 (EUSEW 2016) took place from 13 to 17 June with local Energy Days being organised across Europe during the whole month of June. Launched in 2006, EUSEW aims to promote secure, clean and efficient energy, and connecting policymakers, stakeholders and citizens to achieve climate and energy goals for the Energy Union.

TRUST EPC @ THE COVENANT OF MAJORS FOR CLIMATE & ENERGY

On June 3rd, Trust EPC was presented and discussed during the Covenant of Mayors webinar. The webinar covered two major issues, of relevance especially in Southern countries: how to build “trust” in financial institutions in private (tertiary) sector energy efficiency projects and the topic of business models and financing schemes for residential, commercial, public and industrial PV projects.

TRUST EPC @ THE ENGINEERING FOR SUSTAINABLE DEVELOPMENT FORUM

On September 29th, the Trust EPC project will be presented during the “Engineering for Sustainable Development Forum”, organized in Granada-Spain. The Forum is addressed to researchers, private sector, public organizations and civil society in the fields of sustainable development, climate change, renewable energy, water, sustainable mobility, social entrepreneurship and financing instruments for sustainability.

ABOUT TRUST EPC SOUTH

The Trust EPC South aims to unleash the tertiary sector market potential for private energy efficiency investments in Southern Europe by developing a new financial assessment instrument backed by an established building rating methodology (Green Rating™). Such instrument shall support energy service companies (EPC providers and facilitators), financing institutions and tertiary market actors thanks to the application of a standardised methodology to the investment assessment and decision processes, ultimately allowing to reduce barriers to energy efficiency investments. Trust EPC South, a project financed by the European Union’s Horizon 2020 programme, will pursue its ambitious objectives in Portugal, Spain, France, Italy, Croatia and Greece.

The project has received funding from the European Union’s Horizon 2020 research and innovation programme under grant agreement No 649772.
