Phoenix Park, Linné Room
Nice, France
Thursday 11th of July 2019
9am – 5pm

Conference on soft & active mobility and health

Organised by ENERGIES 2050 on behalf of the project MOBILITAS, by AtmoSud, & by the Regional Health Agency in Provence-Alpes-Côte d'Azur within the frame of its Regional Plan Health Environment

With support from Nice Côte d’Azur Metropole, the city of Nice and the Region Sud Provence-Alpes-Côte d’Azur

ENERGIES 2050, on behalf of the MOBILITAS project and its consortium, AtmoSud and the Regional Health Agency in Provence-Alpes-Côte d’Azur, with support from Nice Côte d’Azur Metropole, the city of Nice and the Region Sud Provence-Alpes-Côte d’Azur, are pleased to invite you to their event on soft & active mobility and health which will take place in the Phoenix Park’s Linné room in Nice on Thursday 11th of July 2019¹.

The aim of this event, organised around thematic round tables, presentations and debates, will be for participants to get a better grasp on the impacts of atmospheric pollution on health and the climate system, to understand the urgent need to act on air quality and to explore the crucial role played by transport and mobility issues to improve our environment and our health. Specific territorial planning, alternatives to individual vehicles, financing mechanisms and concrete solutions at different scales and in different regions will be presented as examples.

Come and discover actions implemented in Region SUD and in other Euro-Mediterranean territories (in Italy, Slovenia and other countries of the MOBILITAS project)!

You can already register for this event by clicking on the link below. https://forms.gle/LRtqyWABJ6gJH53YA

Together, let's invent innovative solutions for Mediterranean cities!

¹ A welcome coffee, light lunch and networking cocktail will be offered onsite to participants.
## Provisional Programme (Animated by Gaby Olmeta, Journalist)

<table>
<thead>
<tr>
<th>Schedule</th>
<th>Session</th>
<th>Speakers</th>
</tr>
</thead>
<tbody>
<tr>
<td>9am</td>
<td>Opening session</td>
<td>Philippe Pradal (First deputy of Nice, Metropolitan advisor) &amp; Professor Olivier Guérin; Stéphane Pouffary (Executive director ENERGIES 2050); Pierre-Charles Maria (President AtmoSud); Mr. Debaumont (Regional Health Agency - ARS); Jean-Luc Fugit (President of the National Air Council)</td>
</tr>
<tr>
<td>9.20am</td>
<td>Introduction to the issues of mobility, territorial planning and health</td>
<td>Laetitia Mary (Territorial action AtmoSud): Provence-Alpes-Côte d’Azur, a touristic region highly exposed to air pollution; Slavko Mezek (Mobility expert, Koper Regional Development Centre (RDC), Slovenia): Sustainable mobility, a key issues for the euro-Mediterranean; Sylvia Medina (Programme coordinator « Air and health » - Public health France): Air quality, mobility and health</td>
</tr>
<tr>
<td>10.45am</td>
<td>Initiatives for soft, active and sustainable mobility in the Mediterranean (series of pitch)</td>
<td>Serge Jover (President of the environmental conservation association in Villeneuve-Loubet): Raising drivers’ awareness with pollution radar MIQASS; Ivo Cvjetković (Deputy head Traffic department - Dubrovnik, Croatia, MOBILITAS partner): Tackling mobility issues in a highly touristic city; Larisa Kunst (MOBILITAS coordinator, Koper RDC – Slovenia): Monitor the impacts of traffic on the environment; Panayiotis Papadopoulos (Mayor - Pano Platres – Cyprus, MOBILITAS partner): New tools to develop sustainable transports; Gabriel Plassat (elected delegate to mobility and transports in Mouans-Sartoux, co-founder of the Fabrique des Mobilités): Developing the use of bycicles</td>
</tr>
<tr>
<td>11.45am</td>
<td>Roundtable: what is the level of mobilisation of territorial actors around these issues?</td>
<td>Françoise Schaetzel (city advisor, advisor of Strasbourg Eurometropolis, President of the French municipalities alliance for air quality); Pascale Licari (Doctor in charge of promoting physical activity and health, ARS); Professor Olivier Guérin</td>
</tr>
<tr>
<td>12.45pm</td>
<td>Lunch offered to participants onsite</td>
<td></td>
</tr>
<tr>
<td>2pm</td>
<td>Initiatives for soft, active and sustainable mobility in the Mediterranean (series of pitch)</td>
<td>Guillaume Sabiron (IFP Energies Nouvelles): Presentation of the application Geco Air associating soft and active mobility; Valentina Ridolfi (Rimini Strategic Plan Agency – Italy, MOBILITAS partner): A handbook for sustainable mobility in the Mediterranean; Dr Alain Fuch (Azur Sport Santé): Presentation of 2 actions developed for children and adults in companies; Laura Trevisan (Project manager Paragon Europe, Malta, MOBILITAS partner): E-mobility shared systems presentation; Zadar city representative (Croatia, MOBILITAS partner): Surveys of cycling infrastructures to reinforce sustainable mobility plan; Guillaume de Laboulaye (ENERGIES 2050): The ethiCycle application</td>
</tr>
<tr>
<td>3pm</td>
<td>Towards a more sustainable mobility: the challenge of implementation L</td>
<td>Representative DREAL or ADEME: Plans vélo – regulations, regional plans for tourism and incentives; Stéphane Pouffary (ENERGIES2050): Promoting sustainable, liveable and resilient territories in the Mediterranean; Ségolène Chignard (Officer in charge of the regional cycling policy, Region Sud Provence-Alpes-Côte d’Azur): Regional scheme Véloroutes, progress of the Mediterranean by bicycle initiative, inter-modality bicycles and public transports</td>
</tr>
<tr>
<td>4pm</td>
<td>Restitution and closure</td>
<td>ENERGIES 2050/MOBILITAS &amp; AtmoSud &amp; ARS &amp; NCA or Nice</td>
</tr>
<tr>
<td>5pm</td>
<td>Networking cocktail</td>
<td></td>
</tr>
</tbody>
</table>

*Each session includes a time of debates and exchanges with participants – live translation English to French and French to English will be provided.*
A few words about the organisers

MOBILITAS (Mobility for nearly zero CO2 emissions in Mediterranean Tourism destinations) is a project co-financed by the European Regional Development Fund under the Interreg-MED programme. It aims to promote low-carbon mobility in Mediterranean tourist areas, by adopting methodologies that can then be replicated on a larger scale. This project is coordinated by the Regional Development Centre of Koper in Slovenia and involves nine other partners from a total of seven Euro-Mediterranean countries (Slovenia, France, Italy, Croatia, Malta, Greece and Cyprus).

AtmoSud is the Air Quality Monitoring Observatory in Provence-Alpes Côte d'Azur. This observatory, approved by the French Ministry of Ecological and Solidarity Transition, is an associative structure bringing together 4 groups of actors. AtmoSud is a member of the Atmo France federation. AtmoSud's missions are to assess the population's exposure to atmospheric pollutants, inform the population about daily air quality and in case of pollution peaks, raise awareness on behaviours that help to preserve air quality, and support local actors (government services, local authorities, industries) in actions to preserve and improve air quality, within an integrated air/climate/energy/health approach.

The Regional Health Agency in Provence-Alpes Côte d'Azur is a public administrative institution, under supervision of the French Ministry of Solidarities and Health, in charge of defining, leading and monitoring the regional project on health. The agency defines, schedules and ensures the implementation of regional health policies, including health issues related to the environment, in consultation with health stakeholders, elected officials and users of the health system, and taking into account regional specificities. In the second regional project on health 2018-2023, issues related to environmental change, i.e. climate change and the impacts of air pollution, are among the challenges to be met to preserve the health of current and future generations. The Regional Health Agency supports stakeholders in taking into account health issues at a very early stage, in all sectoral and spatial planning policies.

ENERGIES 2050 was founded in 2011 and contributes, at the international level with States and international institutions, but also as close as possible to territories with local governments, public and private economic actors and citizens, to the transformation of our societies. As a non-profit and non-governmental organisation, ENERGIES 2050 is committed to the implementation of the Great Transition, whether it is the fight against climate change, the implementation of sustainable development, the energy transition, sustainable cities and territories or the creation of a more humane, plural and supportive society, fostering peace and respecting the common goods of humanity. The association brings together members and partners of more than 70 nationalities and operates in more than 50 countries.
