Recruitment of a bilingual Confirmed Expert on Climate Finance (French-English)

Climate finance & mechanisms associated with the implementation of the Paris Agreement and monitoring of negotiations on climate change

Objective of the position

ENERGIES 2050 association is strengthening its team on the mobilization of climate finance and on the mechanisms of the Paris Agreement (PA) and the follow-up of Climate Change international negotiations.

Objective is to support the association in the development of its activities relating to the operationalization of the PA under the United Nations Framework Convention on Climate Change (UNFCCC) and, in particular, the implementation of (Intended) Nationally Determined Contribution (INDC). It is also a question of contributing to the implementation of adaptation and mitigation projects within the framework of major international agendas (Climate change, 2030 Agenda for sustainable development, Biodiversity, Urban Agenda, etc.).

Presentation of the recruiting organization

ENERGIES 2050 (www.energies2050.org) is a non-profit, non-governmental organization engaged at the international level in the fight against climate change, the implementation of a shared and sustainable development and the establishment of a more human, plural and united society, bringing peace and respectful of the common goods of humanity. The association brings together members and partners of more than 70 nationalities. Together, they are implementing projects in as many countries.

The association and its network support international institutions, national and subnational governments, local authorities as well as multi-stakeholders coalitions, CSO, public or private organisations in the development and implementation of strategies, programs of action and low carbon development projects with high innovation potential in the fields of mitigation, adaptation and resilience. Together they work according to a systemic and inclusive approach on transversal topics such as human rights; gender equality; protection of indigenous peoples and minorities; the Sustainable Development Goals (SDGs); the fight against climate change or the preservation of biodiversity. Mention will also be made of programs dedicated to the energy transition, the mobilization and deployment of climate finance, territorialisation, cities and the built environment, water or agriculture in addition to capacity building.

Context

ENERGIES 2050 is a recognised stakeholder in climate change negotiations. ENERGIES 2050 has, among others, been honoured to support several developing countries in preparing their Intended Nationally Determined Contributions (INDC) within the COP21 preparation process as their contribution to the 2015’s Paris Agreement. The association is currently engaged in the process of revising several NDCs and in setting up monitoring and evaluation systems. The association and its partners have also submitted and carried out projects and programs in the context of climate finance and in particular the Green Climate Fund (GCF), the Adaptation Fund or the Global Environment Facility, or under the carbon mechanisms. The subject of the territorialisation of climate commitments in Africa and the establishment of a structured dialogue between national and local levels are also at the heart of the association's activities. ENERGIES 2050 has also been writing for several years’ reference documents in support of climate negotiators such as the Guide des négociations sur les changements climatiques and its Résumé pour les décideurs on behalf of the Institut de la Francophonie pour le Développement Durable (IFDD) a subsidiary institution of the Organisation Internationale de la Francophonie (OIF).
